002

An alien king who sees her for the first time he madly falls in love with her and also (obsessed and Possessive).

An 18-year-old orphan girl cannot live without the internet, Wi-Fi, a smartphone, a laptop, and a small house.

She is also like him but she doesn't he is very madly at her because he doesn't let her know and if someone comes between them and if they try to separate him, he will kill them one by one very badly. He knows she can live without TV, internet, smartphone, other gadgets, and laptop before he takes her to his alien planet so he builds Domo a small house with oxygen, and also sets internet and Wi-Fi just like Earth house. The first time she saw an alien injured she was scared she decided to help him in front of her he turned into a human form because he didn't want to see his alien form. She also loves him but he is mad she is very scared of him but she says if she goes to an alien planet she can't breathe and also can't live without the TV, internet, Wi-Fi, smartphones, laptops and other gadgets. He already knows she can't live without the internet and another thing.

He said go pick the things you need but He was very mad to hear that she scared him. But he does not show her because he loves her so much and so he forces her to take her to his world, force her to marry him. When she saw her new house, she was surprised it was exactly like Earth's house. She gave up everything. She doesn't have any other choice. And he loves her. Take good care of her & treat her like a queen and every night make love (sex). And a few years they had 4 children and lived well.

The Dome-Shaped Habitat Design is a thoughtfully crafted environment combining the comforts of Earth with futuristic technology to support human life on a distant planet. Here's an in-depth look at each component:

The Dome Structure

Overview: The main transparent dome is divided into three core sections: the Living Area (residential space), Barn (animal husbandry), and Greenhouse (agricultural area). Each section serves a distinct function, supporting various aspects of sustainable, comfortable living in the dome.

Location: Situated in a harsh, desert-like terrain on a distant planet.

Design: A transparent, dome-shaped structure creates a protective, Earth-like environment.

Environment: Equipped with an oxygen-rich atmosphere and a controlled climate, it provides comfort and safety for inhabitants, simulating Earth's atmosphere.

Power Source: Advanced solar panels and other sustainable energy solutions power the dome, supporting an eco-friendly, long-term habitation model.

The Family Residence

Layout: A cozy, four-bedroom, four-bathroom family home within the dome.

Amenities: The apartment features a fully equipped kitchen, a welcoming living room, and entertainment options such as an AC, TV, Wi-Fi, and other smart appliances, smart devices like smartphones and laptops and other gadgets.

Design: The interior exudes warmth, comfort, and familiarity, helping inhabitants relax and enjoy a leisurely lifestyle.

The Greenhouse and Mini-Farm

Hydroponic System: Rows of vegetables, fruits, and herbs are grown sustainably within a hydroponic setup.

Animal Husbandry: A small section houses chickens and a cow, providing fresh eggs, milk, and meat.

Design: Modeled after a mini-supermarket, this greenhouse reinforces self-sufficiency by providing fresh produce directly to the family.

The Garden and Swimming Pool

Garden: A lush, Earth-like Garden within the dome brings beauty and tranquility.

Swimming Pool: Adds recreational value, allowing residents to unwind and enjoy leisure activities, enhancing their quality of life on the alien planet.

Humanoid Helpers: Maids and Security

The dome includes humanoid helpers that enhance comfort, security, and sustainability.

Robots Bodyguard:

Function: Responsible for discreet, continuous monitoring of both indoor and outdoor spaces, ensuring family safety.

Appearance: Appears human-like, adding a sense of familiarity and peace of mind.

Robots Household:

Role: Handles daily household chores such as cleaning, washing, and organizing.

Versatility: Adapts to various tasks, contributing to a well-maintained and orderly living space.

Robots Chef:

Function: Specializes in culinary tasks, equipped with advanced cooking tools and ingredients.

Technology: Represents the latest in automated cooking, allowing efficient preparation of diverse meals.

Robots Gardening and Greenhouse:

Features: Equipped with wheels and a mechanical arm for efficient movement and precise work.

Tasks: Handles eco-friendly duties like watering plants and managing crops, emphasizing sustainability in the dome.

The humanlike Robots and bodyguard not only assist with daily tasks but also serve as companions. The family, particularly the female residents, often spend time with these helpers, forming bonds and enjoying shared experiences, fostering a sense of community within the dome.

Summary

This dome habitat is a unique blend of advanced technology and Earth-inspired comforts, offering a safe and sustainable lifestyle on an alien planet. It supports human resilience, companionship, and harmony with the environment, making life beyond Earth feel both adventurous and homely.
